

SW800

VIBRATORY TANDEM ROLLER

10 ton double drum vibratory rollers for asphalt compaction

SW800: High Frequency (4000 vpm), Standard Vibration

The SW800 can be operated at 30–60% faster speed than those conventional vibratory roller of 2500 or 3000 vpm setting.

Thus, the compaction work can be finished while asphalt mix is still hot and the SW800 makes smooth and dense mat.

SW800N: Oscillation

The SW800N is a oscillatory (horizontal vibration) roller and is suitable for compaction of thin pavement (no crushing of aggregates), bridge (not affecting structure), or near residential area or IT factory (environmentally friendly operation).

Excellent Compaction Performance

- (for SW800 for SW800N for all models)
- Faster compaction speed without increasing impact spacing
- Easy selections of vibration settings via selector switches;
 Frequency, amplitude, auto/manual mode, drum selection
- There are gear driven oscillation mechanism and belt drive type.
 SAKAI SW800N employs the gear drive type that greatly reduces down time and cost for maintenance.
 - * The belt drive type required to replace belts periodically

Reliable and Efficient Water Sprinkler System

- Sprinkler pipe covers against wind for constant spray
- Timer controlled intermittent spray
- Rust free water system
- Hand-dismounting type durable brass spray nozzles
- Triple filtering system, complete water drain for winterization

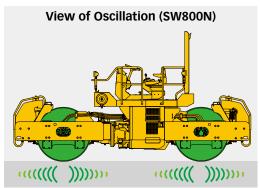

Operator Comfort and Safety Features

- 180 degree swiveling operator console
- SAKAI's original shock absorbing system for better vibration isolation and longer parts life
- Emergency pedal brake for additional safety

180 degree swivel seat is standard

IPM: Number of Impacts per meter

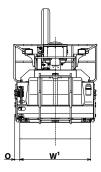

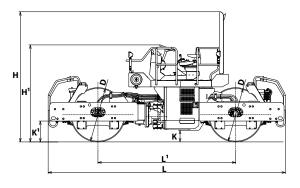

The photos may contain optional equipment and/or attachmentt.

- The specified figure have a tolerance of ± 5%...
- All specifications may be changed without notice.
 The specified figures are in SI Unit, followed by their equivalent English Unit of
- Maximum operating weight includes 100% fuel, 100% water and a operator of 75 kg.
- Operating weight includes 50% fuel, 50% water and a operator of 75 kg.

ISO9001 certified Tokyo Head Office, Tokyo Factory, Global Service Division, Technical Development Division.

SAKAI HEAVY INDUSTRIES, LTD.

HEAD OFFICE: 1-4-8, SHIBA DAIMON, MINATO-KU, TOKYO JAPAN TELEPHONE: +81-3-3431-9971

FACSIMILE: +81-3-3436-6212

Standard Equipment:

- Instrument panel Gauges Scrapers for both directions Horn
- 180 degree swivel seat Front-facing working lights
- Rear-facing working lights
 Front/rear independent vibration control
- Pressurized water sprinkler system
 Intermittent water spray timer
- 4 points lifting Vandalism protection

Optional Equipment:

● AWNING ● ROPS-Canopy w/ seat belt ● CABIN ● Air conditioner ● Heater
